

IFM2B10: Group Project Proposal

Due Date: 29 July 2026

As an Informatics 2B student, across the semester, you will learn about different theories applicable to developing E-Commerce applications and technologies that can be used to create such applications. Before you begin to work on your group practical, your Team must make project proposals to be approved by an assistant during a practical session or by the module lecturers.

Each Team will submit 1 document with all the ideas. The document should have:

- Name of the Team.
- Each Team member's details:
 - Student number.
 - Surname & Initials.

Each project idea must have the following:

- Name of the system.
- E-Business category (must be a single category).
- Business case description.
- List of possible users (at least two types of users - i.e. a client and an administrator).
- Value added by the project.
- What sets it apart from current systems in that domain.
- List of technologies the Team intends to use.

NB:

- Only the following E-Business categories can be used for this project: B2C, B2B, and C2C.
- Diagrams may be used in the project idea descriptions.
- Only the elected team leaders must upload the project proposals in the **IFM2B Group Project** Section on Moodle.

NOTE:

- All practical content learned during the semester will be requested.
- Students must show business acumen by supporting their business ideas with a properly built web application.
- Students will need to demonstrate their problem-solving skills to meet all project requirements.
- Students will complete peer reviews.
